

## C# Developer – Farmvet Systems

**Following our recent worldwide alliance with Vetoquinol, Farmvet Systems Ltd is now going global, with a strong global partner. We are currently recruiting a C# Developer to join our team. The successful candidate will have a strong programming background and will be responsible for the implementation and support of new and existing software solutions for our clients in the veterinary and animal health sector.**

Reporting to our Product Development Manager and working in close collaboration with our IT Department, your missions / main responsibilities will be:

- Responsible for the design and development of new and existing solutions (written in C#) that interact with a wide variety of external sources
- Delivering software solutions with a strong focus on performance, scalability and security
- Developing APIs to provide highly performant web services architecture
- Coordinating with the Product Development Manager, team members and other stakeholders (including clients) to meet business objectives
- Having technical discussions and providing technical expertise to a collaborative team, designing and developing software solutions
- Identifying problems uncovered by customer feedback and testing, and correct or refer problems to appropriate personnel for correction.
- Evaluating code at both a personal and team level, to ensure it meets industry standards, is valid and is compatible with browsers, devices, or operating systems.

The successful candidate will have experience and knowledge of the following technologies:

- Considerable C# software development experience
- ASP.Net (with C#)
- SQL Server / MySQL
- Experience processing data formats such as XML, JSON, CSV
- Web service (or WebAPI, REST) development and deployment
- HTML, CSS, JavaScript, JQuery/AJAX
- Source Control (SVN/Git)
- Experience working in an Agile environment with continuous integration and deployment
- Working knowledge of web servers and web application servers
- Working knowledge of test plans and processes

If you can apply yourself with creativity and intellectual rigour, have exceptional hands-on problem solving skills and can adapt rapidly to changing circumstances, you'll find there are significant opportunities to progress.

On offer is a salary of £28,000 - £35,000 per annum depending on experience + benefits, working as part of a small team based near Cookstown / Magherafelt. Flexible working and some working from home is also offered.

To apply for this role please send an up-to-date CV to the following email: [jobs@farmvetsystems.com](mailto:jobs@farmvetsystems.com) (Please use the Subject header: "Application for C# Developer role")
