

Mobile Developer – Farmvet Systems

Farmvet Systems is a highly successful UK-based provider of digital tools to farm animal veterinarians. Our VetIMPRESS platform allows the vet to spend more time providing farmers with the best possible service and care for their animals. The technology increases efficiency and decision support for vets by improving the management of vet workflows, farm data and practice business insights.

Following our recent worldwide alliance with Vetoquinol, we are currently recruiting a Mobile Developer to join our team. The successful candidate will have a strong mobile programming background and will be responsible for the implementation and support of new and existing software solutions for our clients in the veterinary and animal health sector.

Reporting to our technical leads and working in close collaboration with our IT Department, your missions / main responsibilities will be:

- Responsible for the development and support of new and existing mobile and web applications
- Coordinating with technical leads, team members and other stakeholders (including clients) to meet business objectives
- Having technical discussions and providing technical expertise to a collaborative team, designing and developing mobile and web-based applications
- Identifying problems uncovered by customer feedback and testing, and correct or refer problems to appropriate personnel for correction
- Evaluating code at both a personal and team level, to ensure it meets industry standards, is valid and is compatible with devices, browsers or operating systems

The successful candidate will have experience (3+ years) and knowledge of the following technologies:

- JavaScript programming experience
- HTML, CSS, JQuery/AJAX
- KnockoutJS, AngularJS or equivalent
- Native and/or hybrid mobile applications
- Web development experience (C#, ASP.NET, ASP.NET MVC)
- Microsoft SQL Server, SQL
- Web service (API) development
- Working knowledge of web servers and web application servers
- Working knowledge of test plans and processes

If you can apply yourself with creativity and intellectual rigour, have exceptional hands-on problem-solving skills and can adapt rapidly to changing circumstances, you'll find there are significant opportunities to progress.

On offer is a salary of £28,000 - £35,000 per annum depending on experience + benefits, working as part of a small team based near Cookstown / Magherafelt. Flexible working and some working from home is also offered.

To apply for this role please send an up-to-date CV to the following email: jobs@farmvetsystems.com
(Please use the Subject header: "Application for Mobile Developer role")
