

Farmvet Systems Ltd

Farming Data, Yielding Insight

Senior Software Developer

Are you seeking the perfect combination of established company security, start-up freedom and making a real difference to global challenges? If you're looking for a role that offers hands-on, small-team buzz and creativity backed by big company benefits and peace of mind, all whilst improving the health of animals, people, and our planet, then Farmvet Systems is for you.

We are a founder-run software company with a market leading product that's been around for over a decade. We help mobile, rural vets make the best decisions possible for the animals under their care so that farmers can efficiently produce safe, affordable food. We significantly impact the responsible use of antibiotics and reductions in energy use, water use and greenhouse gas production on farms. Since 2018 we've been owned by Vetoquinol - a multinational company who recognise us as highly strategic for their exciting transformation to solution provider instead of pharmaceutical product company.

Join our team of software professionals and discover what it's like to have the best of both worlds:

- Small team working diligently, efficiently, and intelligently
- Hybrid (remote and in-office) working
- Avoid city traffic on office days
- 32 days paid holidays per year (including statutory holidays)
- Flexible and family-friendly working
- Bonus scheme
- Work with business stakeholders from across Europe and beyond
- Make a real difference to global sustainability

Farmvet Systems is looking for a highly experienced senior software developer to join our team in Moneymore on a hybrid basis, working mainly from home but coming into the office when appropriate. Working on our core VetIMPRESS SaaS product for the agricultural veterinary market, you'll work closely with the Product Owner and the rest of the Scrum team to develop and maintain software related to our web and mobile applications and our data ingestion, analytics, warehousing, and reporting services.

Our teams develop and support applications used by customers globally. The ideal candidate will have a strong software development background, particularly with Microsoft technologies including C#.NET and Microsoft SQL Server, but also with JavaScript, HTML and CSS, mobile technologies. Experience with data analytics and warehousing would be beneficial but not required.

You'll write code and work collaboratively to test and deploy applications and support them in a production server environment. Working knowledge of software development and security best practices are a must.

You'll have demonstrable skills and experience in:

- C#.NET or ASP.NET
- .NET Core & .NET Framework
- MS SQL Server
- REST API development
- Source code management with Git
- Object-oriented methodologies

Ideally, you'll also have experience with:

- Agile software development practices (Scrum)
- Hybrid mobile application or PWA development and deployment
- Automated software testing, ideally test-driven development (TDD)
- Information management, data analysis and data warehousing

As a senior software developer, your responsibilities will include:

- Development & support of new and existing applications, including APIs, websites and mobile applications
- Working with stakeholders to elicit and refine technical and business requirements to meet strategic objectives
- Driving technological improvements by designing and implementing effective solutions to meet requirements
- Serving as an expert resource for code best practices, providing feedback via code reviews and technical mentorship to the development team
- Demonstrating mastery and leadership in tackling complex problems, utilising advanced problem-solving skills and mentoring team members on effective problem-solving techniques
- Acting as a subject matter expert in the system, mentoring and coaching other team members and driving improvements
- Championing SOLID principles and patterns, continuously evaluating and improving the quality of the codebase and helping to lead the technical direction of the company

We are offering a basic salary of £40K–55K per annum depending on experience.

To apply for this role, please email your CV and covering letter to jobs@farmvetsystems.com.
